EDUCATION

University of Washington

Bachelor of Science in Computer Science and System

Expected graduation: May 2028

Green River College

Associate in Computer Science

May 2026

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Statistics, Software Design, System Programming.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, HTML/CSS, R

Frameworks: React Native, Flask, FastAPI, TensorFlow

Developer Tools: Git, VS Code, Visual Studio, PyCharm, IntelliJ

Libraries: Pandas, NumPy, Matplotlib, OpenAI APIs

EXPERIENCE

Student in resident

Mascot GO

Jan.2026 - Present

Remote/San Francisco, CA

- Collaborated with the MascotGO team to improve user experience by contributing feedback on UX flows, student engagement strategies, and outreach initiatives for students and educators.
- Analyzed large datasets to identify user behavior trends and inform product strategy, including building an AI-powered system that provided students with climate insights for their destination locations.

Quantitative Research Intern

ThinkNeuro.LLC

Jun. 2025 – Aug. 2025

Remote/Seattle, WA

- Researched **Brain-Computer Interface (BCI)** systems using **Python (Pandas, NumPy, SciPy)**, **R**, and **MATLAB**, synthesizing insights from **100+ scientific papers** on neural signal processing and interface design.
- Produced reports shaping methodologies in **neural decoding**, **EEG/MEG preprocessing (MNE-Python)**, **signal processing**, and adaptive interface design for **2 active BCI projects**.

PROJECTS

Gator Guide | *Python, React Native, AI System Design*

Jan 2026 - Present

- Served as Project Manager and Lead of the AI team, coordinating a 10-student developer team and managing collaboration workflows through Git and source control practices.
- Developed an AI system that automatically determines students' potential degree pathways at Green River College based on their intended major and future career goals.
- Computed and vectorized data from 6,000+ schools to build a recommendation system that matches students with schools aligned to their academic interests and career objectives.

Digital Fridge | *Python, AWS, Bedrock, AWS S3, React JS, firebase*

Dubhacks'25

- Built a full-stack web app to help users track and manage their fridge inventory.
- Implemented automatic expiry tracking and push notifications for soon-to-expire items.
- Developed a recommendation engine that suggests recipes based on what's inside the fridge to reduce food waste.
- Designed a secure, scalable storage system on AWS S3 for storing user data and food images.
- Leveraged AWS Bedrock to improve food recognition or recipe suggestions.

HONORS AND AWARD

ICPC Pacific NorthWest Regional contest division 2 (C++)

Top 8

November 2025

Seattle data AI hackathon

Third place

December 2025
